

How to Use the Digital History Reader

Assignments

The Assignment section furthers your understanding of the module materials through self-assessment, discussion, and writing exercises. In the Assignment section, you'll find an online quiz that tests your grasp of the materials and scores your efforts. You can also connect to an online survey that allows you to evaluate the content, design, and effectiveness of the module. We value your opinion greatly, and your comments and suggestions can impact further development of the Digital History Reader.

Each Assignment section also includes suggested classroom exercises, such as essay assignments, in-class writing exercises, and structured discussions. You can use the suggested classroom discussion and writing assignments to review the materials covered in the module, and your instructor may decide to assign them in class.
